

STAR Attestation Registry Entry Form

The information below is provided as a companion to the CSA STAR Attestation.

Organization Name **Organization URL**

Cloud Service Business Description (200 words or less)

Noname Security protects APIs in real-time and detects vulnerabilities and misconfigurations before they are exploited. The Noname API Security Platform is an out-of-band solution that doesn't require agents or network modifications, and offers deeper visibility and security than API gateways, load balancers, and WAFs. Noname Security is the only solution that covers the entire API security scope across three pillars — API Posture Management, API Runtime Security, and Secure API SDLC.

Scope and Applicable Trust Service Principles and Criteria

Security, Availability, Confidentiality

Verify CCM Version Used ☐ Version 3.0.1 ☒ Version 4.0

Attestation Period (MM/DD/YYYY) From To
