

SecureCloud 2012 Conference Sponsorship Information

SecureCloud 2012

SecureCloud 2012 is a premier educational and networking event on cloud computing security and privacy, hosted and organized by Cloud Security Alliance (CSA), the European Network and Information Security Agency (ENISA), CASED/Fraunhofer SIT and ISACA, four of the leading organisations shaping the future of cloud computing security.

SecureCloud 2012 is the only European conference to focus specifically on cloud computing security. It provides a unique opportunity for political and corporate decision-makers, CEO, CTO, CISOs, business leaders, and information security practitioners not only to learn, but also to make important global contacts and to participate in interactive strategy sessions with high level experts in cloud computing security. SecureCloud 2012 will have a special focus on the legal and policy aspects of cloud computing security.
